PROFESSIONAL SUMMARY

Backend and Distributed Systems Engineer with hands-on experience designing scalable server architectures, real-time messaging pipelines, high-performance C++ tools, and decoupled microservices. Proven track record of implementing Domain-Driven Design (DDD), CQRS paradigms, and resilient messaging systems using NestJS, RabbitMQ, and PostgreSQL. Focused on writing optimized database queries, building low-latency C++ data structures, and delivering secure payment integrations (Stripe Connect, Paymongo Philippines). Solved 220+ Data Structures & Algorithms problems.

TECHNICAL SKILLS

- **Languages:** C++, TypeScript, JavaScript, Python, Java, SQL, C
- **Backend Frameworks:** NestJS, Node.js, Express, Django, REST APIs, WebSockets
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Architecture & Patterns:** Microservices, Domain-Driven Design (DDD), CQRS, Event-Driven Architecture (EDA), Event Sourcing, Inbox-Outbox Pattern
- **Libraries & Tools:** RabbitMQ, BullMQ, TypeORM, Mongoose, Docker, Socket.io, Git, Linux (CLI), TailwindCSS

PROFESSIONAL EXPERIENCE

Zenmonk Software & Services | Full Stack Developer

Feb 2026 – Present

- Architect modular microservices platforms using NestJS, Next.js, React, and TypeScript with decoupled domain logic.
- Implement resilient asynchronous message pipelines and event-driven communication systems utilizing RabbitMQ and Docker.
- Apply Domain-Driven Design (DDD) and CQRS patterns to build maintainable, decoupled core application modules.
- Participate in agile peer code reviews, automated route testing with Postman, and schema validation.

Techbuilder | Node.js Developer

Nov 2025 – Feb 2026

- Developed backend service modules utilizing Node.js and Express to process multi-vendor payment transactions.
- Integrated Stripe Connected Account architectures managing vendor payouts, escrows, and split ledger balances.
- Integrated localized GCash, GrabPay, and credit card API processing gateways using the Paymongo Philippines API.
- Standardized integration profiles, writing schema tests and validating request routes using Postman.

CodeQuotient Academy | MERN Stack Intern

Feb 2025 – Nov 2025

- Built responsive full-stack applications using MongoDB, Express, React, and Node.js (MERN) stack.
- Mastered core computer science principles and data structures, completing over 220+ challenges on LeetCode using C++.

KEY PROJECTS

C++ Custom Web Crawler | Raw C++, Sockets, Data Structures, Memory Management

- Built a web crawler in raw C++ using custom generic string, linked list, and hashmap libraries — completely avoiding external dependencies or standard string methods.
- Designed socket networking protocols for low-level memory efficiency, automated recursion, and zero unnecessary runtime overhead.

Custom C++ Library Suite | Raw C++, Templates, Algorithms, Memory Audit

- Designed and engineered generic C++ data structure and utility libraries from scratch, including custom implementation of HashMap, LinkedList, and String classes.
- Implemented manual pointer tracking, copy/move semantics, RAII memory safety, and optimized search-complexity bounds.

Eternal Frames | React.js, TypeScript, Canvas API, Node.js, Express.js, PostgreSQL

- Engineered a responsive web platform for dynamic canvas rendering, custom frame compositions, and asset layer management.
- Optimized client-side canvas rendering performance and server-side image processing pipelines for high-resolution visual processing.

Deca Chat | NestJS, WebSockets, Socket.io, React, TypeScript, Redis, MongoDB, Docker

- Architected a real-time messaging platform featuring multi-room WebSockets messaging, live presence tracking, and instant delivery.
- Utilized Redis Pub/Sub for horizontal socket scaling and MongoDB for persistent conversation state management.

Distributed LinkedIn Clone | *NestJS, Next.js, TypeScript, PostgreSQL, WebSockets, Docker*

- Developed a full-featured social platform to explore scalable backend messaging, connection search graphs, and real-time feed updates.

EDUCATION

Master of Computer Applications (MCA) <i>Chandigarh University</i>	Pursuing
Bachelor of Computer Applications (BCA) <i>Arya P.G. College, Panipat (Kurukshetra University)</i>	2021 – 2025 CGPA: 7.5
Class 12 (Senior Secondary) <i>Arya Sr. Sec. School, Panipat (HBSE Bhiwani)</i>	HBSE Board
Class 10 (High School) <i>Arya Sr. Sec. School, Panipat</i>	HBSE Board

ACHIEVEMENTS & ACTIVITIES

- Ranked 1st Place in On-Spot Programming/Coding, Zerone IT Fest.
- Ranked 2nd Place in Bug Hunt / Debugging, Zerone IT Fest.
- Served as a National Cadet Corps (NCC) Cadet and National Service Scheme (NSS) Volunteer.
