PROFESSIONAL SUMMARY

Backend and Distributed Systems Engineer with hands-on experience architecting microservices platforms, high-concurrency event-driven pipelines, low-latency C++ engines, and AI workflow integrations. Proficient in Domain-Driven Design (DDD), CQRS, and Event-Driven Architectures (EDA) using NestJS, Node.js, Express, RabbitMQ, PostgreSQL, and MongoDB. Expert in data access layers utilizing TypeORM and Mongoose, Redis caching/scaling, and secure payment systems (Stripe Connect, Paymongo, Razorpay). Solved 220+ Data Structures & Algorithms challenges on LeetCode.

TECHNICAL SKILLS

- **Languages:** C++, TypeScript, JavaScript (ES6+), Python, Java, SQL, C
- **Backend & APIs:** NestJS, Node.js, Express.js, RESTful APIs, WebSockets, Socket.io, Microservices, Domain-Driven Design (DDD), CQRS, Event-Driven Architecture (EDA), Inbox-Outbox Pattern
- **Databases & ORMs/ODMs:** PostgreSQL, MongoDB, Redis, MySQL, TypeORM, Mongoose, TypeORM Transactional
- **Messaging & Event Queues:** RabbitMQ (amqplib), BullMQ, Redis Pub/Sub
- **AI, Payments & Tools:** LangChain, LangGraph, Google Gemini API, Deepgram Voice STT, FFmpeg, Stripe Connect, Paymongo API, Razorpay, Docker, Git, Linux (CLI), Postman, React, Next.js, TailwindCSS

PROFESSIONAL EXPERIENCE

Zenmonk Software & Services | Full Stack Developer | *Mohali, India* **Feb 2026 – Present**

- Architected modular microservices platforms using NestJS, Next.js, React, and TypeScript with decoupled domain logic and TypeORM relational persistence models.
- Implemented resilient asynchronous message pipelines and event-driven communication systems utilizing RabbitMQ, BullMQ, and Docker.
- Applied Domain-Driven Design (DDD) and CQRS patterns to build maintainable, decoupled core application modules.
- Participated in agile peer code reviews, automated route testing with Postman, and schema validation with Zod.

Techbuilder | Node.js Developer Intern | *Mohali, India* **Nov 2025 – Feb 2026**

- Maintained scalable backend services in Node.js for a ride & food delivery platform (mobile app + web dashboard), supporting real-time orders.
- Integrated PayMongo and GWallet (Philippines) payment gateways and architected Stripe Connected Accounts for vendor/driver onboarding and automated payouts.
- Designed webhook-driven payment flows.
- Worked extensively with Git and GitHub (feature branches, pull requests, code reviews, merge conflict resolution) to ensure clean collaboration and stable production releases.

CodeQuotient | MERN Stack Intern | *Panchkula, India* **Feb 2025 – Nov 2025**

- Built responsive full-stack applications using MongoDB, Mongoose, Express, React, and Node.js (MERN) stack.
- Mastered core computer science principles and data structures, completing over 220+ challenges on LeetCode using C++.

KEY PROJECTS

AI Problem Analyzer

Technologies: React, Node.js, Express.js, Google Gemini API, BullMQ, Redis, MongoDB, Socket.io, TailwindCSS

- Engineered an intelligent bug analysis and code diagnosis assistant that parses runtime logs and error traces using Google Gemini API, backed by BullMQ/Redis worker pipelines and MongoDB state persistence.

AI Resume Builder

Technologies: React, TypeScript, Node.js, Express, Deepgram STT, Gemini API, FFmpeg, BullMQ, Redis, MongoDB, TailwindCSS, Zustand

- Engineered an AI profile and resume synthesis platform utilizing FFmpeg to extract audio and Deepgram API (Nova-3 STT) for speech transcription, with Google Gemini API (gemini-1.5-flash) to structure transcriptions into validated JSON profile data, backed by BullMQ/Redis async queues.

Deca Chat

Technologies: NestJS, WebSockets, Socket.io, TypeORM, PostgreSQL, RabbitMQ, Next.js, Redux Toolkit, Chart.js, TypeScript

- Architected a real-time multi-room messaging system utilizing NestJS DDD, WebSockets, transactional Inbox-Outbox message synchronization via RabbitMQ, and a weekly chat analytics dashboard.

Eternal Frames

Technologies: NestJS, TypeScript, TypeORM, PostgreSQL, RabbitMQ, Razorpay, Next.js, Redux Toolkit

- Engineered a multi-tenant event photography gallery & studio management platform featuring subscription tier billing via Razorpay links, modular NestJS DDD architecture, and transactional Outbox messaging with RabbitMQ.

Kanban Management (Zenmonk)

Technologies: NestJS, TypeScript, TypeORM, PostgreSQL, Socket.io, WebSockets, Next.js, Redux Toolkit, Material UI (MUI), DND Kit, Docker

- Developed a real-time collaborative Kanban project board featuring drag-and-drop task tracking via DND Kit, live task status broadcasting through WebSockets/Socket.io, modular NestJS backend with TypeORM migrations, and PostgreSQL relational data storage.

C++ Custom Web Crawler

Technologies: Raw C++, Sockets, Data Structures, Memory Management, Linux

- Built a web crawler in raw C++ using custom generic string, linked list, and hashmap libraries — completely avoiding external dependencies or standard string methods.

EDUCATION

Master of Computer Applications (MCA) | *Chandigarh University* **2025 – 2027**

Bachelor of Computer Applications (BCA) | *Kurukshetra University* | CGPA: 7.5 **2021 – 2025**

Class 12 (Senior Secondary) | *Arya Sr. Sec. School, Panipat* **2021**

Class 10 (High School) | *Arya Sr. Sec. School, Panipat* **2019**

ACHIEVEMENTS & ACTIVITIES

- Ranked 1st Place in On-Spot Programming/Coding, Zerone IT Fest.
- Ranked 2nd Place in Bug Hunt / Debugging, Zerone IT Fest.
- Served as a National Cadet Corps (NCC) Cadet and National Service Scheme (NSS) Volunteer.
